

In the specification:

Replace the original Sequence Listing with the substitute Sequence Listing filed herewith.

Please amend the paragraph beginning at page 5, line 20 as follows:

FIG. 9 shows the alignment of INDY with homologous proteins. The most homologous proteins to the INDY protein (Genbank accession AF217399; SEQ ID NO:2) were identified by Blast. *Indy-2* is a highly homologous *Drosophila* gene (AE003728; SEQ ID NO:3). SDCT1 (AF058714; SEQ ID NO:4) and SDCT2 (AF081825; SEQ ID NO:5) are rat sodium dicarboxylate cotransporters, and hNaDC-1 (U26209; SEQ ID NO:6) is a human dicarboxylate cotransporter. The boxes indicate either identity or similarity to INDY.
